Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments filed August 22, 2005 have been fully considered but they are not persuasive. Applicant alleges that in McDermott, "the LVL1, LVL2 signals have nothing to [do] with a performance demanding level". Examiner disagrees and submits that Georgiou and McDermott do disclose each and every limitation of the claim as discussed in the rejection of the outstanding Office Action [McDermott was cited to teach a rate of reduction controlled by the LVL1, LVL2 signals representing a performance demanding level in the broadest interpretation, i.e., as in how fast or slow should the rate of reduction be]. As such, Applicant's arguments are not persuasive and the rejections are respectfully maintained. All other claims were not argued separately..
